Design and development of a desired Graduate Profile (GP) for the BA (Honors) Degree program in Library and Information Science (BLISC) conducted by the Department of Library and Information Science (DELIS), University of Kelaniya, Sri Lanka

sooria29@yahoo.com

The principal objective of this paper is to explore the design and development a Graduate Profile for the BLISC honors degree, at the DELIS, University of Kelaniya, Sri Lanka and to map it with the K-SAM model (Knowledge is what student can and should know, Skills is what they can and should do, Attitude is how they think and behave and should, Mindset is how they perceive and should perceive the world) developed by the University Grants Commission (UGC) Sri Lanka. Graduate Profiles are the descriptions of attributes like the knowledge, skills, attitudes and behavioral elements (characteristics, qualities, ethics and norms, way of behavior, vision, mission, mindset, world of work are also considered) which a parent university or the educational authority expects from its graduates through the contact and non-contact hours with a view to position these graduates as universal citizens recognized with competent, social, cultural, good mannered, employable and environment friendly groups fitting local, regional, national and international demands and requirements. This is a result of a qualitative study performed on the basis of action research, content, needs and SWOT analysis and observation and experience matching and also of an ongoing study covering the BLISC degree program and its undergraduates. All the local and foreign curriculum standards relevant to study were also used. The 14 attributes expected from the BLISC Graduates are the 1.Subject Knowledge Capable (K), 2.Skilled (S), 3.Behavior Changer (A), 4.Information Literate and Lifelong Learner (SAM), 5.Language and Communication Competent (SAM), 6.Researcher and Scholar (SAM) 7.Analytical and Critical Thinker (SM), 8.Agent of Attitudes (A), 9.Planner and Time Manager (SA) 10.Problem Solver (SAM), 11.Environment and Social Friendly Group (AM) 12.Courageous Leader (SA) 13.Honest and Cultural Obedient Person (AM) 14.Dedicated Serviceman (K-SAM) and the final goal expected from GP is to develop a Visionary Global Citizen. How the BLISC undergraduates realize the major domains of K-SAM developed by the UGC are marked and mapped with the 14 attributes of the proposed GP above.

The attributes are mapped and embedded in the BLISC Degree program. There are altogether 42 study units in the curriculum and out of that, 26 are theory papers, 11 independent assignment based units, three practical or laboratory based units, 01 industrial training unit and the independent dissertation, altogether 42 units positioning in total 123 credits. While total study units attempt to inculcate the Knowledge domain of the undergraduates, 22 units develop Skills and 08 address the Attitudes and 6 units focus the Mindset domain. The dissertation and the industrial training units both play a major role in K-SAM. In addition to the BLISC curriculum, the field trip, library workshop method, Library and Information Science Student Association, three students’ societies
namely English, IT and Library and all other creative and social functions like Teachers Day have been planned to improve these four domain K-SAM introduced by the UGC. Everything is directed to achieve the objectives of the GP.
