### **ABSTRACT**

Undiagnosed diseases are particular types of diseases that could not investigate the etiology and causal factors. These diseases couldn't be managed successfully by recognized medical techniques. But the patients still suffer from physical ailments. Hence, undiagnosed disease has become a puzzle in medical science and at the same time it becomes an endless, trouble to the patient.

Parapsychology, a sub field of psychology is the discipline which studies metaphysical basis of the human behavior. The metaphysical factors which are study in parapsychology are karmic laws, supernatural beings, voodoo and extra sensory perception.

The objective of this paper is to study the para psychological factors of undiagnosed diseases. For this purpose five cases were selected, and all five patients have gone through a long period of Western medical treatment, investigations from various medical doctors, both MBBS and consultants. As they have not received a successful clear finally got the treatment of white magic and were cured. To study the five cases their prescriptions, X-ray reports were collected. The prescriptions and test reports were submitted to a natural psychology consultant and his opinion was sort. Secondly a psychological opinion on the same prescription test report were obtained. As the final step the demonologist who did the white magic treatment was interviewed. And his opinion on the illness was also taken in to consideration. The study shows that white magic could successfully manage undiagnosed diseases in which Western medicine and psycho therapy failed.
